I don't have any industrial Experience, I am highly motivated and eager to contribute to your team. If given the Oppourtunity, I am committed to applying my skills and dedication to deliver exceptional results.

VOLUNTEERING

Beta - Microsoft Learn Student Ambassador

Microsoft.

2024 July – Present

- Student Ambassadors are a global group of campus leaders who are eager to help fellow students, create robust tech communities and develop technical and career skills for the future.
- I have successfully organized and executed Technical events on my campus, showcasing my leadership and event management skills.

TECHNICAL SKILLS

- Programming Languages: Java
- Web Technologies: HTML5, CSS3
- Database: MySQL
- Tools, Platforms: Git, Github, Azure, Figma
- Other Skills: Agile Methodologies, Problem-Solving, Team Collaboration

PROJECTS

Principles of UX/UI Design

this project is to redesign the booking interface to enhance usability, accessibility, and overall user satisfaction. By applying principles of UI/UX design, we will create a streamlined, visually appealing, and efficient booking system that meets the needs of diverse users, ensuring a positive interaction with the Little Lemon brand.

This Project is given by Meta in Coursera for course Completion.
